REASONS FOR ALLOWANCE

1. Claims 2-7, 9-15, and 17-21 are allowed.
2. Claims 1, 8, and 16 are cancelled.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a method for providing a floating point product comprising: multiplying a subprecise operand and a non-subprecise operand; and correcting an error introduced by the subprecise operand by performing an operation in conjunction including the determination the position of a delimiter bit contained within a first significand corresponding to the subprecise operand; and generating the compensating summand utilizing the determined position of the delimiter bit wherein the compensating summand is initially equal to a second significand corresponding to the non-subprecise operand as cited in independent claims 3, 11, and 17.

The closest found prior art is Deerfield (U.S. 3,725,649). Deerfield discloses a method for providing a floating point product comprising: multiplying a subprecise operand and a non-subprecise operand; and correcting an error introduced by the subprecise operand. However, Deerfield fails to disclose the step of correcting an error further include the determination the position of a delimiter bit contained within a first significand corresponding to the subprecise operand; and generating the compensating summand utilizing the determined position of the delimiter bit wherein the compensating

summand is initially equal to a second significand corresponding to the non-subprecise operand as seen above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
